

Skittles colour experiment -

<https://www.science-sparks.com/skittles-experiment/>

Try this experiment and what happens to the colours.

Remember to read your reading book and practise any sound cards that you have. Read to as many different people and as many times as you can!

Have a go at making a colourful pompom.

<https://www.thesprucecrafts.com/how-to-make-pom-poms-2116513>

What could you turn your pompom into?

Visit your local library to choose some books. Which one is your favourite and why?

Counting!

We are going to be doing lots of counting in school using some of our counting collections. Can you find collections of different things to count - for example, you might count your toy cars, teddies or how many spoons there are in your kitchen.

Enjoy some painting, drawing or modelling! Practise holding your pens and brushes correctly or cutting with scissors. Experiment with colours, shapes and see where your imagination takes you.

Blackbirds Homework Menu Autumn Term

Choose some of the activities from this menu to try at home. Share what you have been doing on Tapestry for your class to see.

Phonics - we will be sending home sheets with words and sounds to practise based on what we have been learning in phonics. These will be sent home on a Thursday. Most weeks, once phonics teaching starts.

Pick up a colour chart from your local DIY store and use it to search for different colours in the garden or on a walk. What colours do you find the most of? Which colours were you surprised to find?

Take some photos of people and things which are important to you, print them out and stick them on a big sheet of paper or in a book. Write about your photos with an adult - do as much writing as you can yourself, and get your adult to do the words that you get stuck on.

Choose something like a piece of music or a piece of art you love. How does it make you feel? What does it remind you of? Can you make up a story about that piece of music or art?
